

Welcome to DecodeLabs: Mission Accomplished

A screenshot of the AWS Management Console. The page title is 'Security Groups' and the specific resource is 'sg-0b87bf72a08d87811'. A green notification banner at the top states: 'Inbound security group rules successfully modified on security group (sg-0b87bf72a08d87811 | launch-wizard-1)'. The 'Details' section shows the security group name 'launch-wizard-1', its ID 'sg-0b87bf72a08d87811', and its description. Below this, the 'Inbound rules' tab is active, displaying a table of two rules: one for HTTP on port 80 and another for SSH on port 22. The left sidebar contains navigation links for EC2, Instances, Images, and Elastic Block Store. The bottom of the console shows a footer with copyright information for Amazon Web Services, Inc. and links to Privacy, Terms, and Cookie preferences.
